

NOLEMIEL BAÑOLA

SOC Analyst | Cybersecurity Enthusiast

About Me

Passionate Computer Science student specializing in cybersecurity, penetration testing, and network security. Experienced in using tools such as Wireshark, Metasploit, and Python scripting for security analysis and vulnerability assessment. Continuously developing practical skills through hands-on projects, self-directed learning, and cybersecurity research. Dedicated to improving digital security and understanding modern cyber threats and defense techniques.

Language

- English
- Tagalog

Expertise

- Penetration Testing
- Network Security
- Vulnerability
- Assessment
- Security Analysis
- Python Scripting
- Linux Fundamentals
- Web Security
- Cybersecurity
- Research

Experience

2018

Self-Directed Cybersecurity Learning

Built foundational knowledge in cybersecurity through practical learning and hands-on experimentation using tools like Wireshark, Metasploit, Linux environments, and Python scripting.

2021

Cybersecurity Research & Projects

Worked on cybersecurity-related projects involving vulnerability assessment, network analysis, web security testing, and malware behavior research while improving defensive security practices and ethical hacking techniques.

2024

Security Analysis & Threat Research

Focused on studying web application security, cryptojacking threats, DDoS mitigation, and secure system configurations while exploring methods for identifying and preventing cyber attacks.

Education

University Of Nueva Caceres

University of Nueva Caceres
Bachelor of Science in Computer Science
2024 - Present

Skills Summary

Penetration Testing
Network Analysis
Web Security
Python Scripting
Security Research
Linux Environment
